

# **CLM1612 12A -AS Series Device**

### **Description**

Current Limiting Module (CLM) is a chip type surface mountable device that can protect against both overcurrent and overcharging. It comprises a fuse element to ensure stable operation under normal electrical current and to cut off the current when overcurrent occurs. It also comprises a resistive heating element that could be used in combination with a voltage detecting means, such as IC and FET. When overvoltage is detected, the heating element is electrically excited to generate heat to blow the fuse element to achieve overvoltage protection.

# P2221 P1423

### **Features**

- · Halogen-free
- Overcharging protection
- Overcurrent protection

## **Application**

- Notebook
- Cell phone
- Camera
- Ultrabook

- Tablet PC
- · Automotive applications

· Surface mountable

· Fast response time

- Printer
- Security systems

# **Agency Approval and Environmental Compliance**

Agency	File Number	Regulation	Standard		
c <b>FL</b> °us	E331807	Halogen Free	IEC 61249-2-21:2003		
Regular Production Surveillance	TA 50428400				

RoHS Directive: Compliance (This product complies with RoHS exemption requirements, since the high melting temperature solder and electronic ceramic parts include Lead.)

### **Electrical Specifications**
